The Art of Layering

It's what's inside. What you choose to wear, from your sports underwear through to the outer layer will directly impact your performance and well-being during your next sporty adventure on colder days.

The number one mistake consumers make is wearing too many layers. By loading up on clothing and sweating through the garments, you ultimately feel clammy and miserable. ODLO's latest innovation "**Advanced Microclimate Management**" addresses this and is the ultimate solution to physical comfort.

The right layering system offers, no matter what the conditions, an optimal micro climate that manages both body heat and moisture between the different layers, so that sport enthusiasts stay warm and dry all day long. Through their elaborate mix of functional materials and innovative technologies, ODLO's inner layers deliver a perfect balance of breathability, flexibility, insulation and warming properties. Perfect Microclimate Management, achieved through ODLO's advanced layers that complement each other, which will make you feel comfortable and perform better. Will you make the inside count on the outside?

SPORTS UNDERWEAR CONCEPT OVERVIEW

PERFORMANCE

ACTIVE SPINE LIGHT

ACTIVE SPINE WARM's little sister is a lightweight base-layer which helps you to perform at your best. A printed posture-control frame around the shoulders ensures that you straighten up naturally during your training. The improved posture allows you to enjoy better breathing and reduces any muscle fatigue, which will lend you more power for your performance.

ODLO FUTURESKIN

ODLO Futureskin is an outstanding Baselayer range, borne from a unique collaboration between ODLO & Zaha Hadid Designs, which showcases the values shared by the engineers of active layers and the London-based architects: a passion for precision, aesthetics, performance and innovation. This collaboration has led to the next generation of Body Mapping – a must-have for all high-performance-design lovers.

BLACKCOMB

Stylish, tailored and multi-functional, the Blackcomb range, worn next to the skin, keeps you warm, protected and sweat free whether skiing or during whatever other activities you undertake in the great outdoors. Comfort across a wide range of body movements is fully assured through the use of seamless knitting technology, whilst a number of clever 'zones', which feature different properties, have been strategically incorporated into the design to optimise ventilation and provide superior moisture management.

PERFORMANCE WARM

PERFORMANCE WARM is the best performance sports underwear, bar none, and, as the name says, it is "made to perform". The Performance Warm line is also built using the Organic Bodymapping principle, which guarantees optimum temperature regulation and freedom of movement. The line features incomparable sweat wicking and quick-drying characteristics. This makes it the first choice for performance sports on cool days. The athletic design of the Performance Warm line perfectly reflects the Organic Bodymapping approach.

PERFORMANCE LIGHT

PERFORMANCE LIGHT, with its seamless construction and integrated bodymapped functional zones, provides maximum breathability and the best moisture wicking properties where it is needed. It is the right choice for fluctuating temperatures and demanding physical activities – a versatile range of performance sports underwear that can be worn all year round.

ACTIVE

ACTIVE WARM CERAMIWARM

Ceramiwarm as an active warming technology was first introduced in FW18 and is now newly integrated into the Sports Underwear Range. Taking our beloved Active Warm to a higher level. Ceramic Particles integrated in the yarn reflect the body heat and ensure that your body keeps warm and dry during your low- and medium-intensity activities.

ACTIVE EVERYDAY

Performance Underwear is becoming ever more important as many people like to use it for everyday wear and not just during physical activity. ODLO is responding to this trend with a year-round line: Active Everyday. With it, men are getting particular attention from ODLO in this new collection on the topic of support. In this underwear line that is versatile for both sport and everyday wear, ODLO is providing the "Happy Balls" concept. This underwear uses a special pouch technology that provides extra support and keeps everything fresh thanks to a cooling layer in the lower pouch area. The lady bottoms are invisible underneath your tights and make panty lines a thing of the past.

ACTIVE WARM

ODLO's ACTIVE WARM sports underwear range, also known as the Originals, has been a customer favourite for decades. ACTIVE WARM is ideal for all low- to medium-intensity sports and offers good insulation against the cold. Soft stitching and a fleecy brushed interior provide maxi-

mum comfort and a very soft handfeel. Its optimum moisture management and fast drying properties mean you stay pleasantly warm and dry, even when the weather turns colder.

ACTIVE WARM Originals

The Heritage range provides the same comfort as the Active Warm. It combines a super soft handfeel, optimal thermal insulation and fast drying properties with a touch of ODLO Heritage in terms of design.

ACTIVE X-WARM

ACTIVE X-WARM has been designed to provide excellent insulation, even when temperatures plummet. Soft insulation pads are integrated into the garments to ensure that particularly exposed, sensitive areas of the body are protected from the cold. Its excellent moisture management properties guarantee you stay warm and dry at all times.

ACTIVE LIGHT (F-DRY)

ODLO F-dry is an all-around quality sports baselayer which is suitable for a wide range of activities. It is characterised by outstanding moisture management and the highest wearing comfort. F-Dry will keep you dry and comfortable 365 days a year. The polypropylene on the inside of the fabric and the polyester on the outside create a push-pull effect. The polypropylene can't absorb any moisture and so pushes it to the outside, where it evaporates and creates a comfortable cooling sensation. The super soft fabric is equipped with a bio-based finish made from organic and recycled components.

merino wool. This allows the fabric to hug your skin smoothly. The blend of performance and natural fibres has an odour-resistant function and regulates body temperature optimally - no matter if the day is cold or warm. NATURAL (+) KINSHIP WARM likewise boasts a highly sophisticated seamless jacquard weave construction. This means the design is not printed on the fabric, but is achieved through the seamless knit technology. The design of the NATURAL (+) KINSHIP line has been inspired by ODLO's Norwegian roots. ODLO has picked up a Scandinavian knit pattern and re-interpreted it to create a subtle, modern look.

NATURAL 100% MERINO WARM

ODLO 100% Merino is the 200g, all-year-round, quality material for nature lovers. It stands out thanks to its natural body temperature control and anti-odour properties. The super fine 17.5 Micron quality is currently the finest 100% Merino wool available on the market. These fine fibres adapt to the shape of the skin and create an ultimately soft and soothing sensation.

NATURAL + LIGHT

ODLO Natural + Light is a collection created from a mix of two natural materials, both plant and animal fibres. Firstly, our 100% guaranteed mulesing-free origin Merino Wool – at 17.5 Microns provides the garments with body temperature control and natural anti-odour properties. Secondly, we have incorporated Tencel into this collection, whose natural fibres come from the wood pulp of Eucalyptus. It is the most environmentally-friendly fibre originating from plants. The length of these fibres gives the material a soft and silky feel. A first layer that becomes a natural second skin.

NATURAL

NATURAL + KINSHIP WARM

NATURAL (+) KINSHIP WARM is a must for environmentally conscious sports enthusiasts that like to stay comfortably cosy. The unsurpassed comfort is attained by the super soft fabric quality with 50% extra fine
